

Introduction

Thank you for your interest in representing U.S. Heating System in its mission to bring alternative heating systems to the marketplace. Within this packet, you will find information concerning our products, their uses, options, and more.

About U.S. Heating System (USHS). USHS is a privately owned and operated, United States based manufacturer of alternative heating systems designed for both home and commercial applications, providing radiant floor heating, solar space heating, snow melting, and soil heating products. Additionally, USHS offers Infrared Thermal Imaging Inspection for both commercial and residential buildings.
